

## **Training Officer's report 2019**

This has been my first year as part of the ABC committee. It has been very interesting and valuable. As part of the role I have been helping to organise the upcoming ABC study day.

This has involved discussing the topics we think would be relevant and useful, contacting speakers and sponsors to get support for the event, communicating with speakers to ensure the most appropriate and mutually agreeable timeslots, contributing to the flyer and programme for the event, discussing the equipment and catering required and will involve formatting the delegate packs.

I attended an initial meeting with the RCR and other stakeholders to discuss and organise the pilot for the new breast clinician training programme. As we know this is now taking great steps towards completion with valuable input from other members of the committee.

I have helped to add some information to the ABC website to help members keep up to date with useful toolkits and guidance on CPD from the GMC and RCR.

I will also be attending the conference organising committee for the 2020 symposium mammographicum which will be a very exciting opportunity to be involved in this great event.

Best Wishes,

Dr Kate Jenkins

Training Officer

Association of Breast Clinicians
